THE VOICE OF THE MERIT SHOP®

Associated Builders and Contractors (ABC) is a national construction industry trade association representing nearly 21,000 chapter members. Founded on the merit shop philosophy, ABC and its 70 chapters help members develop people, win work and deliver that work safely, ethically, profitably and for the betterment of the communities in which ABC and its members work. ABC's membership represents all specialties within the U.S. construction industry and is comprised primarily of firms that perform work in the industrial and commercial sectors.

- ABC is the merit shop construction industry's voice with the legislative, executive and judicial branches of the federal government and with state and local governments, as well as with the news media.
- ABC's mission is the advancement of the merit shop construction philosophy, which encourages open competition and a free enterprise approach that awards contracts based solely on merit, regardless of labor affiliation.
- ABC's objective is to deal with issues on an industry-wide basis through its national office and chapters.

ABC was founded in 1950 when seven contractors gathered in Baltimore, Md., to create an association based on the shared belief that construction projects should be awarded on merit to the most qualified and responsible low bidders. The courage and dedication of those seven contractors helped to quickly spread the merit shop philosophy, within time making ABC the fastest growing association in the United States. Today, ABC is recognized as one of the leading organizations representing America's business community and the merit shop construction industry.

The Mississippi chapter of ABC was founded in 1973. We are the largest ABC chapter in the nation and the largest construction trade association in Mississippi. Our mission statement is "to protect and enhance the Free Enterprise System and the Merit Shop Philosophy in the Mississippi construction Industry and to be its principal representative."

President Theodore Roosevelt said it best in 1908. "Every man owes a part of his time and money to the business or industry in which he is engaged. No man has a moral right to withhold his support from an organization that is striving to improve conditions within his sphere."
